You are invited to learn about

Aliens in the Estuary

2-Day Invasive Species Workshop Symposium

June 30 & July 1, 2009

Barataria Preserve

Jean Lafitte Historical Park and Preserve

Last fall, scientists found invasive plants and fish in the the Barataria-Terrebonne National Estuary during a week-long sampling. Come to this free workshop to learn what they found, and how all ages can help to control the invaders!

nutria

apple snail eggs

Choose to spend one or two days learning about the invaders and their impacts. Activities and experts will teach you how you can help to stop these invaders! Take home posters, booklets, educational DVDs, and lesson plans.

Each Day (9 a.m.-4 p.m.)

Keynote Address

Reports from scientists

Field activities in the Preserve

Lab activities at the Center

Teacher lesson ideas to fit GLEs

Dress for outdoors

Have fun while you learn

Lunch provided

Continuing ed credit for teachers

Limit: 50 persons each day

rio grande cichlid
